

学术讲座

题 目：Advanced structural characterization of low-permeability rocks:
Applications to natural energy carriers, seal rocks and secondary storage
targets

时 间：2021 年 4 月 28 日下午 15：00-16：00

地 点：腾讯会议，会议 ID: 775 728 924 密码: 202104

主讲人：David Misch 教授

邀请人：申建教授

报告人简介：

Prof. David is the deputy scientific head of the chair of petroleum geology at Montanuniversitaet Leoben. His research interests include integrated basin studies & petroleum system analysis, application of new characterization techniques to geological problems, porosity/permeability evolution in fine-grained rocks with emphasis to diagenetic processes, micromechanics and fracture propagation in fine-grained rocks and organic geochemistry.
